-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 June 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 1 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicants' use of de-ionized water is the only solvent to dissolve the salts and the claims should be directed to this solvent.
3. Claim 26 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Note a spelling error line 8.

Claims 1-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japan 01-276142 or GB 2052081 in view of Ferrar et al. Applicants' arguments have been carefully considered but deemed not persuasive in view of the new references.

Applicants' claims are to a product by process and do not compare the dissolved salt to a non-solvated salt. The use of the dissolved salt is with a water-dispersed polyurethane binder. The art teaches the use of a salt as an over coating for an electrophotographic organophotoreceptor as a charge carrier. Among the salts useful as a charge carrier are the Li and Na salts taught by Ferrar note Col 11 lines 40-65. It would be obvious to one

Art Unit: 1756

of ordinary skill in the art at the time of applicants' invention with a reasonable expectation of success to use the salts as charge carriers as the charge carrier salts as taught in either JP or GB to improve the resistance to migration of the charge carrier.

Claim Rejections - 35 USC § 102

4. Claims 35 & 36 are rejected under 35 U.S.C. 102(a) as being anticipated by Weiss et al. Weiss teaches a charge generating element with an overcoat layer. The overcoat layer can be other than the preferred silsesquioxanes note Col. 5 line 4-10. The salt can be a Li or Na charge carrier salt note table Col. 10- Col. 11 lines 60-65.
